

# webbug-browser.pdf

When opened, this PDF connects to "home"

Click "Allow":

1. Starts your default browser
1. Connects to <http://localhost/webbug-browser.html>

## **Comments:**

Windows:

- Foxit : opens the default browser without any user confirmation (!)
- Acrobat Reader 8: a pop-up spreads asking if it can connect, then Internet Explorer is connected.

Mac:

- Preview: nothing happens
- Acrobat Reader 8: a pop-up spreads asking if it can connect, then Safari is connected

Linux:

- poppler: nothing happens
- Acrobat Reader [7, 8]: a pop-up spreads asking if it can connect
